Mounting Arrangement

To fix the meter with the panel, slide it through the panel cut out. Place the clamp in the fixed area on the meter from the back side one by one, slide it inside so that meter will hold tightly with the panel. To remove the meter from the clamp, uplift the clamp with appropriate pressure else it will get damage and bring it out.

Uplift the clamp with appropriate pressure else it will damage the plastic clamp

Note :

Installations should include a disconnecting device, like a switch or circuit breaker, with clear ON/ OFF marking to Turn Off the Aux Supply (Control Power). The disconnecting device should be placed with in the reach of the equipment & the operator.
